

## Digital output module, 4-channel version for Zone 1 Series 9475/32-04-72

**A4** 

### 4 channels for Ex i hydraulic and solenoid valves up to 95 mA

- Ex ib outputs with line fault monitoring, an LED fault and status display for each channel and SIL2 shutdown input
- Modules in Zone 1 can be replaced without having to disconnect the power supply (i.e. hot-swapped)

The 9475/32-04-72 digital output modules for Zone 1 have four channels for actuating Ex i hydraulic and solenoid valves or indicator lamps. An additional Ex i control input is suitable for safe shutdown up to SIL 2. All outputs are short-circuit proof, galvanically separated from the system and individually monitored to check for wire breakage/short-circuiting.
